## Press Release

---

### **Snug Seat and Nuprodx Join Forces to Bring Enhanced Pediatric Product to Market**

San Rafael, CA, May 15, 2009

Snug Seat, Inc. and Nuprodx, Inc. have teamed up to offer the **Manatee Tub Slider**, a bathing transfer system for toddlers to small adults. The new system is designed to provide improved safety and comfort for both the user and caregiver, as well as furnish a cost effective alternative to installing a roll-in shower. With a single transfer from a bed or other starting point, the caregiver is able to easily transport a child into a bathroom and then over a tub without a single dangerous lift.

The **Manatee Tub Slider** consists of Snug Seat's popular Manatee Bath Chair and the proven multiCHAIR 6000 frame from Nuprodx. The Manatee Bath Chair is available in three sizes and can easily be removed from the slider frame and used independently. The multiCHAIR 6000 frame has a removable connector bridge which allows the caregiver unimpeded access to washing the child while showering and the roll-in frame then becomes a perfect sit-down stool for the caregiver. Both units are made out of materials that will not rust and can fold or break down for easy storage or to take on trips. For more information contact Snug Seat, Inc. at 800-336-7684 or [www.snugseat.com](http://www.snugseat.com).
