## **Shower, commode, and tub slider systems that fit a lifetime.**

Buying a shower / commode chair or tub-slider system represents a substantial investment. Deciding which product best meets the user's needs is a decision to be made with careful consideration: Is it durable? Made from the non-corrosive materials? Portable? Stable? How soon will it need to be replaced? And when a child is involved, what to do when the child grows out of it—does this mean buying a complete new chair?

The answer to that last question is now a resounding “No,” with the introduction of Nuprodx’ Pediatric “Grow” system. This innovative feature utilizes our unique modular design and construction to deliver shower / commode chairs and tub / slider systems that can “grow” with a child. All that is required is a minor adjustment or two, and to change the backrest and seat cushion. And because all Nuprodx shower / commode chairs and tub / slider systems are built from only non-corrosive materials, like aircraft grade aluminum, stainless steel, brass, and Delrin® plastics, you can rest assured that your investment is a sound one, because with only minor updates for sizing, they can last a lifetime.

# Modular Design Means Near Limitless Adjustability

Nuprodx is all about innovation—innovation that allows our shower / commode chairs and tub / slider systems to be adapted to just about any adult living situation. Now, this includes children and teens. With our exclusive modular base system, you can buy any Nuprodx chair—stationary, rolling, or tub / slider system, for a young child, and easily adapt it to fit perfectly as they grow larger. And because not everyone grows at the same rate, we designed in fine adjustability for seat width, depth and backrest width and depth. But even better—and totally unique, with minor adjustments and / or updates to the seat cushion and backrest, you can enlarge the chair only where needed as the user grows, saving literally thousands of dollars as compared to buying a whole new system. Here’s how it works:

## Pediatric 1

The chair comes with the seatback in the forward-most position, narrowing the backrest and moving the user forward on the seat cushion, with a correspondingly-sized commode opening.

## Pediatric 2

For mid-sized seating, the seat post moves to the center hole, and the headrest plate and backrest bracket are relocated. If needed, a wider backrest and larger seat cushion are available.

## Adult

Updating to the Adult configuration is as simple as replacing the seat cushion, backrest, backrest brackets and seat-posts, at a cost that is a fraction of replacing the complete seating system.

## Sizing Guide

Each MULTICHAIR is configured to properly fit the end user. Please refer to the chart below for sizing, and indicate which letter configuration meets your needs when ordering. Sizes can later be adjusted within the three product categories: Pediatric 1, Pediatric 2, and Adult, by repositioning existing brackets. Our exclusive modular design allows for a broad range of adjustability and near-perfect fitting.

	Pediatric 1				Pediatric 2				Adult	
	A	B	C	D	E	F	G	H	I	J
<b>Minimum User's Height:</b>	43"	47"	51"	54"	47"	50"	54"	58"	54"	63"
<b>Effective Seat Width:</b>	13.4"	13.4"	13.4"	13.4"	15.5"	15.5"	15.5"	15.5"	17.6"	17.6"
<b>Effective Seat Depth:</b>	10.7"	11.8"	13.2"	14.3"	11.8"	12.9"	14.3"	15.4"	14.1"	16.2"
<b>Commode Opening:</b>	6"	6"	6"	6"	7"	7"	7"	7"	8"	8"
<b>Commode Slot Width:</b>	3"	3"	3"	3"	3"	3"	3"	3"	4"	4"

= Default position

Effective Seat Width: = Width between inside edges of arm rests

Effective Seat Depth: = Distance from base of backrest cushion to front edge of seat cushion
