

Nuprodx Receives “Best Picks for 2017” Award

Livermore, CA (July, 2017): Nuprodx Inc., designer and manufacturer of innovative solutions for seniors and people with disabilities, is proud to receive a “Best Picks” award from *Mobility Management Magazine*.

Mobility Management, the leading magazine covering complex rehab and mobility, annually asks Occupational Therapists, Physical Therapists, ATPs, and clinicians, who specialize in seating and wheeled mobility, to name the rehab products that they believe makes a big difference in improving the lives of people with disabilities.

The Nuprodx multiCHAIR line was chosen for its durability, versatility and positioning options. Jeff Decker, STP/SMS, CRTS, noted: “I use the Nuprodx line of bath transfer equipment mainly due to the ability to adjust to varied bathroom layouts, the narrow width of the transport section, and it’s made of metal vs. plastic. This allows for very little wear/breakage with years of use, and it can handle additional support pieces such as laterals and headrests.”

The attributes noted by Jeff, a highly qualified Complex Rehab and Mobility professional, are the result of Nuprodx’ unique modular design and patented removeable connector bridge. These features separate the multiCHAIR line from other equipment by allowing unit compactness, plus seating and positioning choices not available on other products on the market. Components can be mixed and matched to configure a transfer system that will work for nearly anyone and in any bathroom, and in the rare instance where custom work is needed, Solidworks 3D CAD-designed components are fabricated in Nuprodx CNC machine shop in Livermore, CA., where all Nuprodx products are made.

Nuprodx Inc.

Nuprodx Inc., is fully committed to developing innovative equipment to improve the lives of seniors and people with disabilities world-wide. Conceived and designed by founder Bruce Hammer, a more than 30-year wheelchair user with C6/7 quadriplegia, Nuprodx bathing transfer systems embody the resourcefulness that both Complex Rehab professionals and persons with mobility-restricting conditions can appreciate. Every Nuprodx transfer system is proudly built to order in our Livermore, California, facility of sturdy aircraft-grade clear-anodized aluminum. Custom positioning configurations available upon request.
