
Nuprodx Introduces MULTICHAIR “Grow” Feature

San Rafael, CA (June 18, 2012): *Nuprodx Inc.*, designer and manufacturer of innovative solutions for seniors and people with disabilities, is proud to introduce the new MULTICHAIR “Grow” feature. Nuprodx’ forward-thinking design and engineering, anchored by the company’s signature modular seat base, now offers customers a stationary or wheeled shower / commode chair or tub / slider system with integrated in-home mobility chair that can be easily fitted for all users regardless of size.

One Shower / Commode Mobility System For Life

The introduction of Nuprodx’ “Grow” system means that users can now purchase a shower / commode chair or tub / slider system for a child, and keep the same unit into, and through, adulthood, saving literally thousands of dollars by eliminating the need buy a whole chair or tub / slider system.

The “Grow” feature accomplishes this with special mounts that enable a simple backrest and seat cushion update for major sizing changes, and built-in fine tuning for smaller adjustments, because not every part of the human body grows at the same rate. This enables the main components of the chair or slider system to remain in place for the life of the chair.

“We’re very pleased to introduce the Nuprodx ”Grow” system to the community,” said Bruce Hammer, Founder and President of Nuprodx. “We know how difficult it can be getting assistance to purchase upgrades for bathing and bathroom systems for a child as they grow larger. Using our modular system, we are able to offer this important feature across our entire product line, helping people of all levels of disability minimize the long-range financial investment required to make the day-to-day activities of life easier over a lifetime.”

How The System Works

Nuprodx' unique modular seat base makes the system possible, via precision-machined rear corner pieces that offer three-position backrest pole mounting locations. This exclusive feature allows users to start narrow and forward, and over time as the child grows, move the backrest back into the full adult size. Positions A and B can be used with the same backrest, with an alternate mid-size one available if needed.

A. - Child

B. - Teen

C. - Adult

Three backrest mounting positions and alternate cushions sizes enable fitting the chair to virtually any size user.

Fine adjustability has been built in and is accomplished by simply alternating the position of existing brackets for up to seven different seat depths even before moving to the adult size.

Adding to the value, like all Nuprodx shower / commode chairs and tub / slider systems, all "Grow" units are built exclusively from non-corrosive materials: Aircraft grade aluminum, stainless steel, brass, and Delrin® plastics. This assures the investment is a sound one, ensuring that with only minor updates for sizing, the system can last a lifetime.

All "grow" units include these hallmarks of a Nuprodx system:

- Self-skinning padded urethane back and seat cushion with 1/2" waterfall-style foam ring around the commode opening and slot help protect ischial and coccyx areas reducing the risk of pressure sores
- Cantilever fold-back / locking padded chair arms
- Adjustable seat height from 20-1/2" to 24-1/2" easily fits over the highest toilets required by the ADA
- Total lock brakes on all casters that prevent rolling or swivel
- Modular construction.
