Press Release

Nuprodx, Inc. Introduces a Larger Front Wheeled Commode & Shower Chair for People with Physical Disabilities and Seniors

San Rafael, CA, January 5, 2009

Nuprodx, Inc. introduces the multiCHAIR 9018rx roll-in commode & shower chair.

Obesity is growing problem for able-bodied Americans with 17% of the population being obese and the rate is significantly higher for people with disabilities and seniors due to limited physical activity. Therefore, to address this rapidly increasing market Nuprodx has introduced the multiCHAIR 9018rx commode & shower chair. The multiCHAIR 9018rx allows a larger person, up to 400lbs, with a disability or senior to transfer directly from their bed into the chair and be wheeled into a bathroom directly over the commode for toileting activities and then into a roll-in shower.

The multiCHAIR 9018rx has a 20" x 20" x 2" thick padded seat cushion to accommodate larger users. However, even with its larger size, Nuprodx has designed the chair to be light weight (weighs about 32lbs) and can easily disassemble and pack into an optional 23" x 23" x 12" carrying case, thus allowing it to be very portable for travel. It is a challenge to find hotels that have handicapped roll-in showers, let alone ones that have Bariatric roll-in shower chairs. Therefore, having the ability to travel with a larger size roll-in commode and shower chair is a nice benefit.

Another unique, patent pending, feature is that the big wheels, 18"-24" in diameter are in the front. This provides several important benefits: 1) is extremely maneuverable, thus making it possible for a care giver to negotiate through tight hallways and in small bathrooms, 2) has an overall width of 28", thus allowing it to fit through standard bathroom doorways, eliminating the need for expensive remodeling, 3) the big wheels in the front easily roll over small thresholds and rough tile making it much more stable than other Bariatric commode and shower chairs on the market, and 4) with the big wheels in the front, the chair is able to back up all the way over most toilets without the wheels hitting the back wall or tank.

Like the rest of the Nuprodx product line, the multiCHAIR 9018rx is made out of materials that will not rust or corrode such as aircraft grade aluminum, brass and stainless steel. It is designed to be rugged enough for everyday use, yet is lightweight and a must have for full-sized people with disabilities and seniors. For more information on the 9018rx and other Nuprodx products visit www.nuprodx.com or call (888) 288-5653.

MORE

multiCHAIR 9018rx

- Nuprodx, Inc. is a California based C-corporation founded in 1998 by Bruce Hammer. Bruce was formerly the number 2 ranked motorcycle racer in the US in 1981. Unfortunately, while competing in an AMA National Championship road race in 1982, Bruce crashed and suffered life threatening injuries, including C6/C7 quadriplegia.
- The company has the following mission statement, “Nuprodx is committed to developing innovative products to improve the lives of millions of people with disabilities and seniors world-wide.”
- Nuprodx has a complete line of products from a simple tub & toilet chair up to a slider system that eliminates all bathroom transfers.
- All chairs are constructed of materials that won't rust or corrode: aircraft grade aluminum, brass, stainless steel and plastic. Equally important is that all products have been weight tested by Gaynes Labs, Inc. (a national testing laboratory)
